**POST OFFICE CAUTION.**

---

**M**UCH inconvenience having been found to arise from Post-masters giving credit to individuals for postage, inasmuch as they are thus unable, when the Quarterly period arrives, to remit their balances to the General Post-Office, it has become my duty strongly to impress upon you that this Department does not recognise such a practice, nor will it ever receive as an excuse from a Post-master for failing to remit his full balance promptly at the termination of the quarter, that *money is due to him for postage!* Post-masters should bear in mind that Postage money is the property of the Government, and that they have no right to make use of it to accommodate their friends, or for any private object.

Item 5B 1891 Great North Western Telegraph Janville, NB (SP 29 91) to Quebec, 1¢ SQ tied by grid cancel, ms "4 cts" which is explained by the contents. It is form #83 requisition for supplies form which is filled in detail and therefore not allowed to go at unsealed printed matter rate (which was attempted and postmarks on reverse show flap was unsealed and tucked in). The letter was shortpaid 2¢, double deficiency or 4¢ due. The form is most interesting in that it identifies the name of each form number, and indicates how many of each were used in the preceding 6 months which will be of great interest to telegraph collectors. The form shows that only 3 message envelopes like this one were used in the last six months whereas 70 messages were received which demonstrates the scarcity of mailed telegrams. A great exhibit item. \$100

# Multiphones..

**The Multiphone is a Musical Instrument  
that every one can play.**

NOT A TOY, BUT A MUSICAL INSTRUMENT, upon which any melody can be  
accurately rendered. One of the greatest musical novelties ever placed on the market.

**NOTHING LIKE THEM. THEY BOOM THEMSELVES.**

**Beautifully Colored, Highly Polished and Substantially Made.**

The principle in mechanism is a vibratory Diaphragm similar to that of the Telephone  
and Graphophone, consisting of a heavy enameled German Fibre Disc with a Metallic Centre  
Pin which with the aid of the voice an intense vibration is produced, enabling the operator to  
correctly imitate the Saxophone, Clarionet, Trombone, Bagpipes, etc., and many  
other musical instruments. Full instructions accompany each instrument.
